

## Financial services

Targeted IT, Clinical, and Scientific Staffing Solutions

INDOTRONIX INTERNATIONAL CORPORATION

## Client

A leading regional Banking corporation

## Service Provided

Production support of bank's ESB system, Design, Development, Quality & Performance testing services via Indotronix' Integration SMEs, incident root cause analysis and providing short and long-term solutions. The Indotronix Platform team also owned internal projects, like software upgrades, services migration from classic environment to highly available environment. Successfully implemented multi-million dollar projects like the bank's Online Account Opening project, Retail Online Banking project & Business Online Banking project.

## Background

Responsible for the bank's integration environment (ESB) which included a platform team responsible for the environment servers and software; and the projects and services that get deployed on it. The bank's ESB system handles complex sensitive business transactions like money transfers, account opening & customer information.

## Challenges

The resources were required to be onsite in an area where the talent pool for highly experience technology professionals was very limited. Hence, Indotronix had to incentivize its consultants to relocate to be enable them to deliver on the project.

## ✓ Client

A Multibillion-dollar Personal Banking and Financial Services corporation

## ✓ Background

Senior Middleware Specialists – IIB 9 developers with strong integration experience and strong JAVA background

## ✓ Project

Bank is in the process of creating an enterprise wide platform to provide electronic notifications to their customers.

## ✓ Challenges

Indotronix has been a vendor on this program for just 9 months and has had to come up to speed very quickly with existing suppliers. The challenge is magnified further since vendors are allowed to submit only one qualified resume for every position. Hence Indotronix had to bring in its 'A' game with every submission with respect to quality of candidates and Account Management. And, we were able to rise to the occasion – Indotronix has risen to the position of one of the top performing vendors in the past 2 quarters.

## ✓ Client

Multibillion-dollar corporation providing ratings, Market Intelligence and Market Indices

## ✓ Background

The parent organization was going through a divestment which necessitated separating out the entire IT system (Infrastructure and Applications)

## ✓ Services Provided

Rendered core IT Infrastructure services - Cloud Architects, Solutions Architect, Database Administrators, Project Managers, Program Managers, UNIX Administrators, Network Engineer

## ✓ Challenges

The primary location of the project was a remote town in Southern NJ. The talent pool available for the requisite high end and high demand IT skills was extremely limited in this remote NJ town and accessibility via public transport literally non-existent. However, Indotronix has always prided itself in going above and beyond when delivering IT services – and we came up with creative alternatives like enabling our consultants to work on the project remotely or from our facilities in the NY/NJ area.

## ✓ Client

An international insurance and financial services organization.

## ✓ Background

All data centers and server rooms worldwide were within the scope of this program. The objective was to migrate the 30 largest data centers and server rooms to 2 main data centers in the US over a period of 18 months – housing approximately 95% of the company's IT presence.

## ✓ Service Provided

Rendered Infrastructure support for their worldwide data center consolidation project. Data Center consolidation services - Infrastructure / Application / Financial / War Room/ Site Project Managers, Solution Architects, Unix/ Linux Engineers, Migration Engineers, Network Engineers, Oracle DBAs

## ✓ Challenges

Indotronix had to ensure that it proactively developed its pipeline and kept potential candidates warm so they could be quickly deployed to respond to the needs of such a large scale project.
