Targeted IT, Clinical, and Scientific Staffing Solutions

INDOTRONIX INTERNATIONAL CORPORATION

✓ Client

Premier Biopharmaceutical company

✓ Service Provided

Project's objective was to develop an end-to-end document management system.

✓ Solution

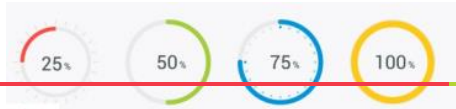

Proactively worked on developing deep pipelines of consultants with Document Management Technology skills

✓ Background

Indotronix consultants were an integral part of the entire life-cycle of the project and architected, designed and developed the system.

✓ Challenges

Indotronix needed the ability to rapidly respond to the requirements of such a large scale 18+ man-month project.

Client

Large Medical Devices firm

Service Provided

Since the company manufactures and sells medical devices, instrument systems etc. there is a huge demand for high-end Clinical and Scientific Skills

Solution

- Worked with the MSP/ Client stakeholders to develop a questionnaire to screen candidates
- Invested in training a select group of recruiters to address the positions
- Our competitive cost structure helped in meeting objectives of both client and consultants

Background

R&D Engineers/ Quality Engineers

Challenges

The pool of talent was very small at work location in isolated Northern NJ town and remote work not an option. The corporation also required consultants to have higher Education (Masters / PhDs) mandatory

As a result, Indotronix is now a successful vendor on both their IT and non-IT programs
