

Telecom

Delivering Solutions Across the Network Spectrum

INDOTRONIX INTERNATIONAL CORPORATION

Client

A leading Fortune 100 telecom company

Service Provided

Supported Oracle Database Architecture, Planning, Designing, Installation, Administration and troubleshooting of huge Oracle databases spread over different locations; Managed/Supported DB 7.x/8.x on Unix platform; supported Oracle Applications covering FI/CO/Inventory modules.

Solution

Indotronix Account Management team worked closely with the project stakeholders to understand the technical needs and work culture. The team also incentivized consultants with hard-to-find skills to work in specific locations. Due to Indotronix' consistent ability to deliver above and beyond it has been retained as vendor for 18+ years.

Background

Project involved mission critical support related to Databases support and Administration and troubleshooting of huge Oracle databases spread over diverse locations in the UN

Challenges

Some of the skill sets required were very hard-to-find and consultants were needed onsite in disparate locations.
